

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE BRYOLOGIST

PUBLISHED BY THE

SULLIVANT MOSS SOCIETY

The only magazine in English devoted wholly to Mosses, Hepatics, and Lichens. Bimonthly; amply illustrated; for beginners as well as for advanced students. Yearly subscription, \$1.25. Address

EDWARD B. CHAMBERLAIN,

18 West 89th Street,

NEW YORK CITY.

Illustrations by Photomicrography

Photomicrographs and lantern slides made of vegetable and animal tissues and other substances to illustrate original scientific papers, textbooks, lectures, and popular articles, advertising, etc. Materials and manufacturing processes compared by photomicrographic methods.

Color screens used to preserve correct color values and also to increase contrast and bring out any particular structure.

Specimens prepared for photographing.

All magnifications. Size of field unlimited. Zeiss apochromat oculars and Zeiss compensating eyepieces used.
